# Continuum GRC ITAM Overview

Cyber Security and Compliance is Unnecessarily Complicated!

Automation eliminates the tedious and complicated manual compliance requirements facing your organization.
Protect your business and your sensitive compliance data with **Continuum GRC ITAM®**.

Step 3: Maintain

Security and compliance requires ongoing work to keep current. Use proven automation tools and methods to help sustain and maintain! ITAM protects your data within a certified cloud environment.

Step 1: Assess Risks

Identify the cyber security risks that threaten your organization. It's hard to eliminate problems if you don't know where to look! Start with your data and move out from there. ITAM® makes it easy to assess risk using industry guidance.

* Suggestion: NIST 800-30

Step 2: Internal Audit

Having a clear roadmap helps you be effective and efficient. Rely on established frameworks! ITAM guides you through from start to compliance.

* Suggestions: NIST 800-53, 800-171, and the Cyber Security Framework (CSF).
