Why Choose Us

01.

About Us

Continuum GRC delivers cloud-first governance, risk, and compliance solutions that simplify complex audits and security programs. Our flagship platform centralizes evidence, automates controls testing, and provides real-time reporting so teams can prove compliance faster with less effort. Backed by seasoned assessors and security practitioners, we pair technology with expert guidance to help organizations design resilient programs that scale.

"Your Roadmap To Risk Reduction!"

From startups pursuing their first SOC 2 to global enterprises maintaining FedRAMP, HIPAA, PCI, and ISO certifications, we streamline every step: scoping, gap analysis, remediation tracking, and auditor-ready documentation. Customers choose us to reduce manual work, cut audit costs, and gain continuous visibility into risk. With Continuum GRC, compliance becomes a strategic advantage instead of a once-a-year scramble.

02.

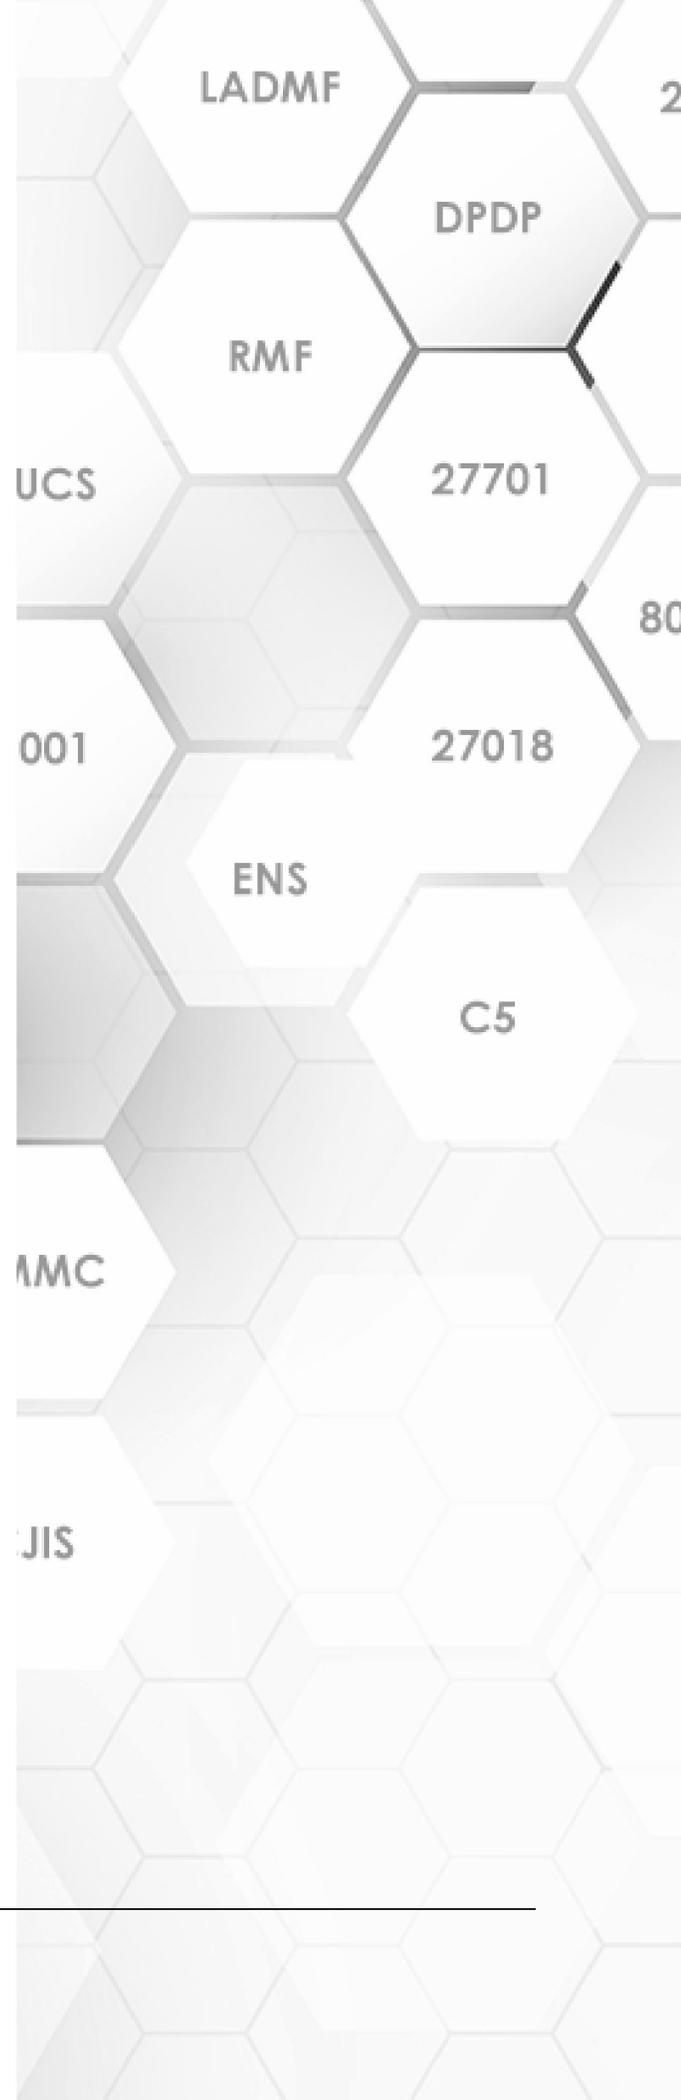

Platform Overview

"Cloud platform to manage controls, evidence, risks, and audits end-to-end securely at scale."

Continuum GRC is a secure, multi-tenant SaaS platform purpose-built for governance, risk, and compliance teams. The workspace centralizes controls, risks, and assets while orchestrating the collection of evidence through automated schedules and integrations with popular cloud services. Role-based permissions keep sensitive data protected, and every action is recorded for defensible audit trails.

100+ frameworks supported "Out of the box".

Teams design control sets once and reuse them across frameworks, eliminating spreadsheet chaos. Dynamic questionnaires, workflow approvals, and task assignments keep projects moving on time. Dashboards show program health, remediation progress, and audit readiness in real time. Exportable reports give executives and auditors clear visibility without manual formatting. With elastic scale, strong encryption, and continuous updates, the platform adapts as your organization grows.

Core GRC Modules

"Supporting the MSP, Enterprise, SMB, and GRC firms around the world since 2015."

Define standards, map controls to frameworks, and track ownership with dynamic workflows and approvals.

Identify risks, score impact and likelihood, assign treatments, and monitor residual exposure across programs.

Automate requests, pull artifacts from integrations, and maintain immutable evidence with timestamps and lineage.

Real-time analytics surface gaps, trends, and audit readiness for executives, auditors, and control owners.

04.

Advisory Services

"Automate 80% of Your GRC Workload: AITAMBot Delivers Compliance Confidence in Minutes—Not Months!"

Readiness reviews and formal audits for SOC 2, ISO 27001, PCI DSS, HIPAA, and FedRAMP.

Evidence scheduling, automated tests, and alerts that sustain compliance between annual certification cycles.

Gap analysis, prioritized roadmaps, and hands-on support to implement controls and close findings quickly.

Workshops and templates that upskill teams, standardize processes, and accelerate self-sufficient compliance.

05.

Framework Coverage

"100+ Frameworks and hundreds of modules."

SOC 2 Type II: Streamlined evidence mapping, control automation, and auditor collaboration to speed successful attestations.

FedRAMP/FISMA: NIST control baselines, SSP automation, POA&M tracking, and continuous monitoring tailored for agencies.

ISO 27001/27701: Integrated ISMS and privacy extensions with risk treatment plans and statement-of-applicability generation.

PCI DSS & HIPAA: Prebuilt requirements, evidence checklists, and reporting to demonstrate secure handling of cardholder data and PHI.

06.

Implementation Process

"Get operational and effective within 24 hours."

Discover & Scope:

Define objectives, in-scope systems, and timelines; import assets and map controls to obligations.

Operate & Remediate:

Run assessments, track issues to closure, and manage risk treatments with owners and deadlines.

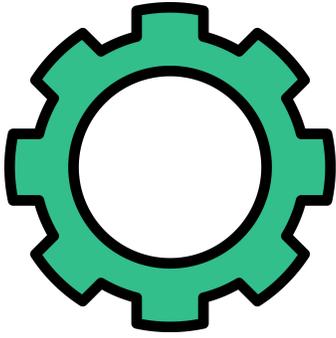

Configure & Integrate:

Set roles, workflows, and integrations; migrate evidence and automate recurring collection tasks.

Certify & Improve:

Prepare audit packages, support external assessors, and iterate with metrics that drive maturity.

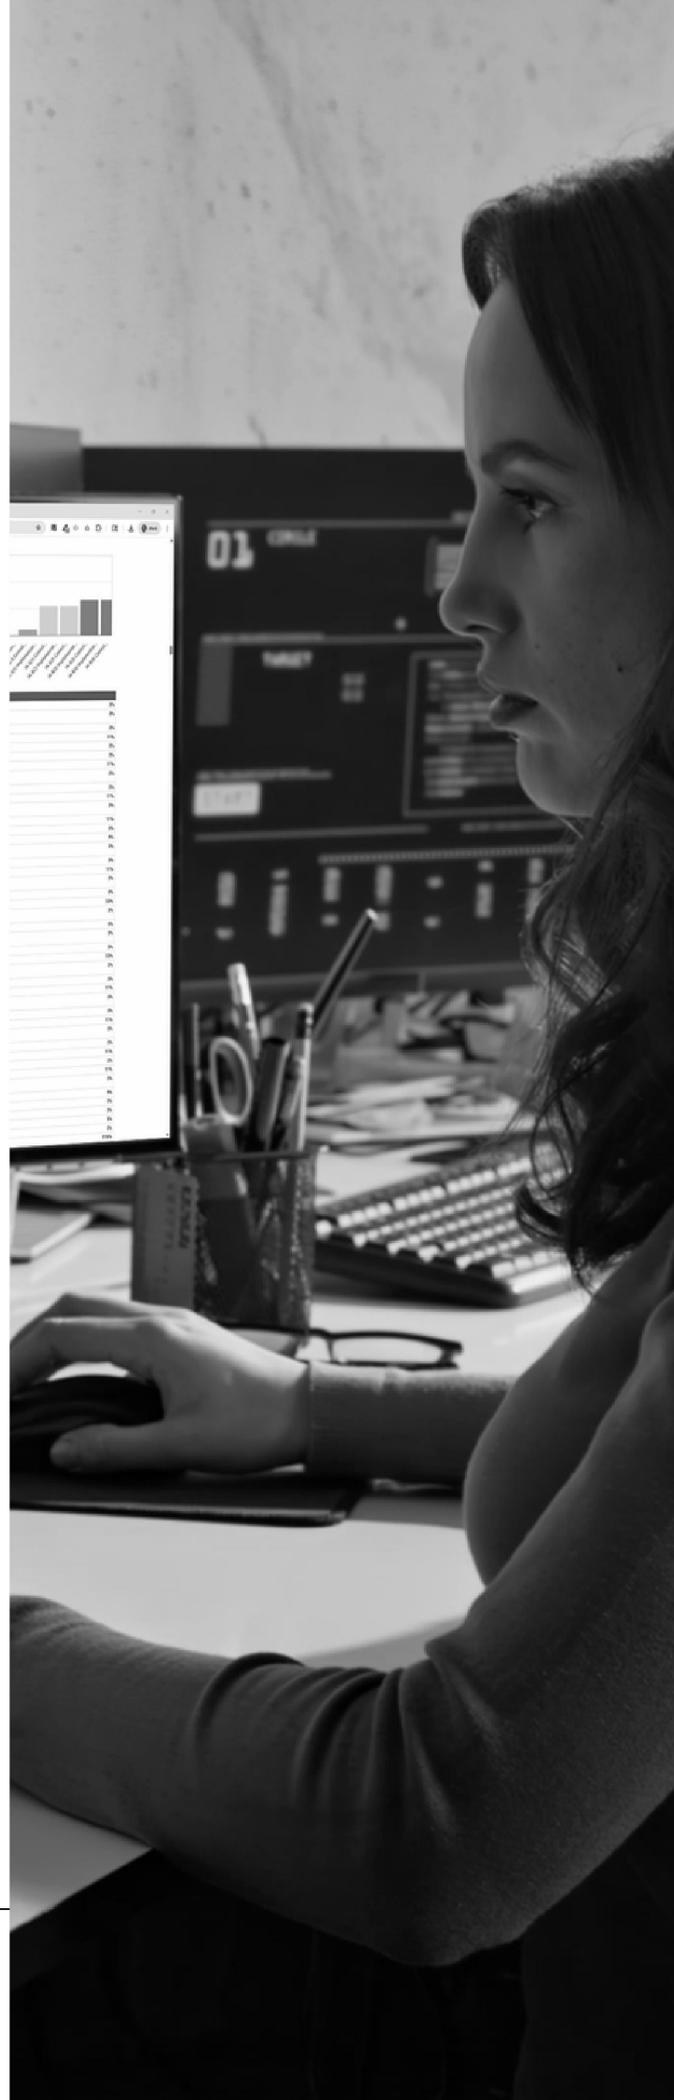

Why Continuum

Proven outcomes, military-grade, zero-trust architecture, and an audit partner you can trust.

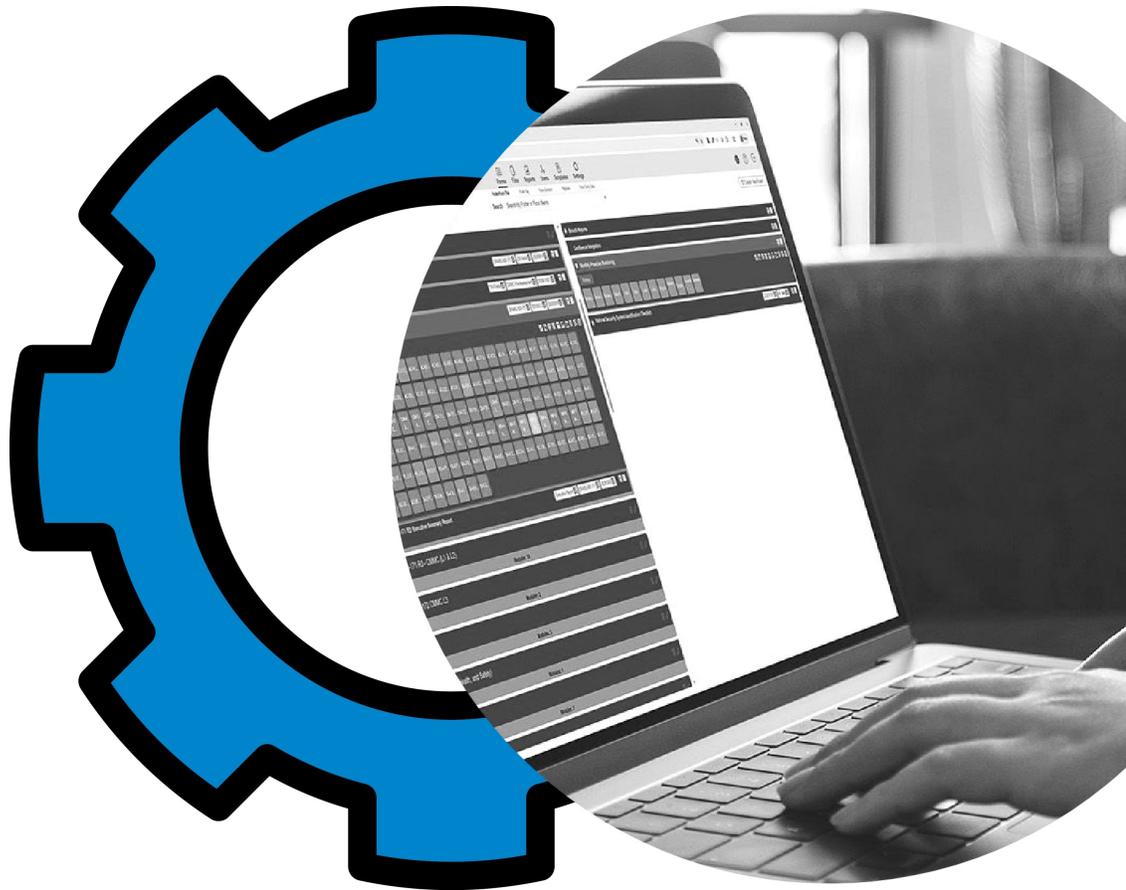

Organizations pick Continuum GRC for measurable outcomes. Customers regularly compress audit timelines by weeks, reduce consulting spend, and maintain year-round readiness. Our platform is engineered with security at the core: data isolation, encryption everywhere, and strict access controls.

"Average customer cuts external audit prep time 78%"

Experienced assessors guide every engagement, bringing deep expertise across regulated industries and federal environments. We focus on service as much as software. Dedicated success managers, clear implementation playbooks, and rapid support keep teams confident. Flexible licensing fits startups and enterprises alike, and transparent pricing avoids surprises. Integrations reduce manual effort, while automation delivers consistent, repeatable results. The result is a reliable partner that helps you prove compliance, lower risk, and free time for strategic initiatives.

08.

Next Steps

Ready to replace spreadsheets and costly, last-minute audit sprints? Continuum GRC brings your controls, risks, and evidence into one secure system and backs it with experts who care about your success. Book a discovery call to review your requirements, see a tailored demo, and receive an implementation timeline with clear next steps.

Whether you need SOC 2, ISO, HIPAA, PCI, FedRAMP, or a combination of the **100+ frameworks** we offer, we'll show exactly how to accelerate certification while building a sustainable program.
